

Thank you for inquiring about Global Insight Research's core product:
Insight Breakout Model (Insight BM).

Product Overview:

Insight BM was designed with statistical research bringing out the simplicity of decision making (having less information to process). *Insight BM* allows you to focus strictly on the breakout out or breakdown levels making it much easier to know the direction of price, this approach allows you to quantify your risk at the Breakout levels.

The breakout model forms a statistical breakout range and the statistical targets. The *Insight BM* range, targets and expected range are automatically computed by the software, making it easy to switch to different instruments. *Insight BM* comes with five different breakout models, this way you can choose the style and the duration of your trade: daily, weekly, monthly, quarterly or yearly. The statistical price target gets hit about 90% of the time. This is actionable **INSIGHT** of the markets natural range and expansion process. The models purpose is to capture range expansion.

Insight BM comes with a proprietary expected range indicator that calculates and adjusts to the recent contraction of range expansion, providing a realistic range projection. The range indicator is setup to track the range providing you with the minimum, current, remaining and expected range. The indicator produces a set amount of range which lines up with the *Insight BM* target. When the expected range lines up with one of the targets, this alignment allows you to see clearly if the odds of price continuing any further pass the target is very low. This allows you to manage your position by booking profits and limiting your market exposure.

Purchase of *Insight BM* includes the following:

Insight BM Chart definitions with the Global Insight Trading Model built using charting software (Investor RT).

- **One-on-One *Insight BM* Training:** During our first meeting we will review *Insight BM* in full detail and how it works. I spend the month teaching the model. We will schedule a date and time that's reasonable for your schedule. We commence with a specific period of your choice: shorter duration or longer, whichever fits your style. We go over how *Insight BM* reveals price behavior and what happened at the breakout point. During these sessions we will discuss what is expected from price on the different models, we will also talk about certain statistical information regarding the breakout range (this is very important data). By learning the *Insight BM* model in this fashion you begin to clearly see the simplicity of this model and how the model reveals "**BREAKOUT**" trade setups. Within a short time, you will learn how to trade the *Insight BM* and risk manage your positions. Training Duration: One Month.
- **Complementary Technical Training:** Most clients inquire about implementing alternative technical trading tools in concert with *Insight BM* such as market cycles, Volume Profile, Market Profile, DeMark, Elliot Wave, etc. While not part of the model, I do share insight as to how to properly use these other tools with *Insight BM*. *Insight BM* have an excellent overlay with many other instruments so you don't have to throw away your other trading tools. In fact, it is our contention that your existing trading toolbox will work better once you understand market structure. For Example, trading tools such as Volume Profile, Elliot

Wave, and Fibonacci Retracements may generate important levels. Naturally price must travel a particular distance and direction to reach these levels. *Insight BM* confirms price moves and tells us whether price actually has an intention of filling a particular level. As useful as some of these other tools may be, without the knowledge of price intention, one simply does not have a verifiable trading strategy with a legitimate risk-reward and profit factor.

- **Optional Add-on Feature: *Insight FM*** reveals daily, weekly, monthly, quarterly and yearly market structure. For an additional fee clients may add-on this product: ***Insight FM (Insight Framework Model)***. Why is this add-on feature so important? The short-Term structure and the long-term model structure provides key tradable structural levels that further confirm areas of structural support and resistance. As the short-term and longer-term price structure develops these structural levels are reinforced and confluence is developed.

As you see the natural framework of price your trading confidence will build because you can see the structural synchronicity over multiple time-frames and have confidence that the structure is reliable and tradable. This brings out confidence in your decision making, as you see the *Insight BM* levels and the structural levels align this makes the decision process clear.

Market Coverage & Trading Style:

Insight BM is meant to be used with any market. The beauty of our system is that we can use our *Insight BM* research on most instruments, so you can trade stocks, futures or forex with *Insight BM* and have confidence that the model will reveal the breakout levels and targets. Time is a commodity and schedules are often fluid... fortunately the *Insight BM* adjusts around you. As your daily, weekly, or monthly schedule shifts, you may shift your trading style to favor longer term high probability swing trades vs. day trades with defined levels of risk.

Software Requirements:

The [Investor RT](#) charting platform is fairly inexpensive. You will need the Professional Linsoft Package (\$70) and DTN Market access for historical data (\$15). For live data, you will need a monthly subscription to a service such as [IQFeed](#) – pricing will vary. Once you sign up I will send you the master chart definitions to import. I will also assist you with setup and provide you with a tour of this very user friendly package using Team-Viewer.

Program Costs: *Insight FM* - \$7,500.00

“NO REFUNDS” POLICY

Since Global Insight Research is offering largely knowledge-based, non-tangible, irrevocable goods and training, we do not issue refunds once the order is accomplished, training has commenced, and trading chart definitions, instructions, or other related materials or products have been delivered. As a customer you are responsible for understanding this upon purchasing any item from Global Insight Research.

Please note that we do not bear any responsibility and therefore we do not satisfy any refund requests based on incompatibility of our products with some third-party software (trading platforms, plug-ins, add-ons, modules, search engines, scripts, extensions, etc.) other than those which are specified as compatible in the introductory letter sent prior to your purchase of this product. We do not guarantee that our products are fully compatible with any third-party programs and we do not provide support for third-party applications.

Global Insight Research is always eager to assist you and deliver highly professional support in a timely manner. Thank you for purchasing our products and by doing so you acknowledge that **ALL SALES ARE FINAL AND THERE ARE NO REFUNDS.**
