

Thank you for inquiring about Global Insight Research's core product:
Insight Framework Model (Insight FM).

Product Overview:

Insight FM allows you to lift the veil on markets, revealing deep, actionable **INSIGHT** into the natural framework of the market.

Imagine entering and trying to navigate your way through an unfamiliar, dark building while blindfolded. You are moving slowly, bumping into things, running your hands along the walls, trying to discern what little you can about your surroundings. Surprisingly, this is how many traders attempt to navigate the markets. Now perhaps some useful tools are part of your current trading repertoire... so let's say that you're not blindfolded and you have a flashlight. Certainly you're doing better than the blindfolded guy, but the building layout is still foreign to you, and your movement from one part of the building to the next involves a lot of guesswork and is highly inefficient to say the least. Employing *Insight FM* is like ripping the roof off of the building and lighting up the structure with you floating above it. You now have a live blueprint for the markets... an aerial view of the structure: levels and edges built upon a beautiful foundation of probability. As price flows, you know exactly where the walls are which will halt movement and when price is reaching an open door that will allow it to move from one room to the next.

Purchase of *Insight FM* includes the following:

Insight FM Chart definitions with the Global Insight Research Model built using charting software (Investor RT).

- **Expected Range Indicator:** Is a proprietary calculation that adapts to the recent contraction and range expansion of price.
- **Too Far/Too Fast "TFTF" Indicator:** This measures the volatility of price statistically and if the range expansion has gone too far too fast, the "TFTF" indicator will show an extreme reading.
- **One-on-One *Insight FM* Training:** During our first meeting we will review *Insight FM* in full detail and how it works. I spend the month teaching the model, we will schedule a date and time that's reasonable for your schedule. We commence with the smaller framework and work into the larger structure. During these sessions we will discuss what is expected from price and the different size frameworks, we will also talk about certain statistical information regarding volatility (this is very important data). The sessions will also cover how to use the expected range indicator and its value. By learning the *Insight FM* in this fashion you begin to clearly see the "**STRUCTURE**" and how the model reveals the edges and probability fields in which the market prices operate. And, within a short time, you will learn how to trade the *Insight FM* and risk manage your positions. Training Duration: One Month.
- **Complementary Technical Training:** Most clients inquire about implementing alternative technical trading tools in concert with *Insight FM* such as market cycles, Volume Profile, Market Profile, DeMark, Elliot Wave, etc. While not part of the model, I do share insight as to how to properly use these other tools with *Insight FM*. *Insight FM* models are an excellent overlay with many other instruments so you don't have to throw away your other trading tools. In fact, it is our contention that your existing trading toolbox will work better once you understand *Insight FM*. For Example, trading tools such as Volume Profile, Elliot Wave, and Fibonacci Retracements may generate important levels. Naturally price

must travel a particular distance and direction to reach these levels. *Insight FM* confirms the price moves and tells us whether price actually has an intention of filling a particular level. As useful as some of these other tools may be, without the knowledge of price intention,

one simply does not have a verifiable trading strategy with a legitimate risk-reward and profit factor.

- **Optional Add-on Feature: *Insight BM (INSIGHT Breakout Model)*** which comes with five different range expansion models. For an additional fee clients may also add-on this product: ***Insight BM (INSIGHT Breakout Model)***. Why is this add-on feature so important? The *Insight BM* reveals breakout out levels and targets across the different size ranges. These different ranges have different targets. The model provide areas where range expansion exists, and by knowing where the range expansion exists you can line up the range expansion with tradable structural levels. Having breakout levels in sync with *Insight FM* structural confluence levels and creates high odds trade setups.

Market Coverage & Trading Style:

Insight FM is meant to be used with any market. While we typically cover 22 Futures instruments, the beauty of our system is that we can model any price structure with it, so you can trade stocks or futures with *Insight FM* and have confidence that the model will reveal the structure. Time is a commodity and schedules are often fluid... fortunately *Insight FM* adjusts around you. As your daily, weekly, or monthly schedule shifts, you may shift your trading style to favor longer term high probability swing trades vs day trades with defined levels of risk.

Software Requirements:

The [Investor RT](#) charting platform is fairly inexpensive. You will need the Professional Linsoft Package (\$70) and DTN Market access for historical data (\$15). For live data, you will need a monthly subscription to a service such as [IQFeed](#) – pricing will vary. Once you sign up I will send you the master chart definitions to import. I will also assist you with setup and provide you with a tour of this very user friendly package using Team-Viewer.

Program Costs: Insight FM - \$7,500.00

“NO REFUNDS” POLICY

Since Global Insight Research is offering largely knowledge-based, non-tangible, irrevocable goods and training, we do not issue refunds once the order is accomplished, training has commenced, and trading chart definitions, instructions, or other related materials or products have been delivered. As a customer you are responsible for understanding this upon purchasing any item from Global Insight Research.

Please note that we do not bear any responsibility and therefore we do not satisfy any refund requests based on incompatibility of our products with some third-party software (trading platforms, plug-ins, add-ons, modules, search engines, scripts, extensions, etc.) other than those which are specified as compatible in the introductory letter sent prior to your purchase of this product. We do not guarantee that our products are fully compatible with any third-party programs and we do not provide support for third-party applications.

Global Insight Research is always eager to assist you and deliver highly professional support in a timely manner. Thank you for purchasing our products and by doing so you acknowledge that **ALL SALES ARE FINAL AND THERE ARE NO REFUNDS.**
