

# GLOBAL INSIGHT CONSULTING

INSIGHT YOU CAN COUNT ON

Thank you for inquiring about Global Insight Consulting's core product:  
***Insight Cycle Swing System Model (Insight CSSM).***

## **Product Overview:**

***Insight CSSM*** allows you to lift the veil on markets, revealing deep, actionable **INSIGHT** into the natural framework of the market.

Imagine entering and trying to navigate your way through an unfamiliar, dark building while blindfolded. You are moving slowly, bumping into things, running your hands along the walls, trying to discern what little you can about your surroundings. Surprisingly, this is how many traders attempt to navigate the markets. Now perhaps some useful tools are part of your current trading repertoire... so let's say that you're not blindfolded and you have a flashlight. Certainly you're doing better than the blindfolded guy, but the building layout is still foreign to you, and your movement from one part of the building to the next involves a lot of guesswork and is highly inefficient to say the least. Employing *Insight CSM* is like ripping the roof off of the building and lighting up the structure with you floating above it. You now have a live blueprint for the markets... an aerial view of the structure: levels and edges built upon a beautiful foundation of probability. As price flows, you know exactly where the walls are which will halt movement and when price is reaching an open door that will allow it to move from one room to the next

**Insight CSSM** was designed using five uncorrelated data points to bring out the simplicity of decision making (having less information to process). **Insight CSSM** allows you to focus on bullish and bearish cycles making it much easier to know what direction prices are headed in. This approach allows you to quantify risk and aim for a specific levels.

**Insight CSSM** is a “trend identifier. There are two main phases of the markets auction that the system is analyzing and confirming, a bullish cycle from an accumulation phase and a bearish cycle from the distribution phase. These two phases create cycles as prices move up away from the accumulation phase to distributions phase and vice versa. Prices seek demand/buyers or supply/sellers on a continued basis known as the two way trade the “markets auction”. When a new bullish cycle starts this is confirming that price is done being accumulated/oversold and it begins a new uptrend as it gets marked up and moves on to its next phase the “distribution phase”. When a new bearish cycle starts this is confirming that price is done being distributed/overbought and it begins a new downtrend as it gets marked down, moving on to its next phase the “accumulation phase”.

**Insight CSSM** comes with three different models, this way you can choose the duration of your trade. The data is automatically computed by the software, making it easy to switch to different stocks, futures or other instruments. This gives a statistical idea where prices are headed as targets get hit and new ones get automatically generated. Ranges are established as new periods start, and the price gets a new statistical bias. There is actionable **INSIGHT** in trading a discretionary new cycle as it’s the most advantageous time to position for a move. This is for two reasons,

1. It’s the most efficient time to quantify risk.
2. Prices are most directional after a new cycle has started, and once a cycle has ended you wait for the next one to start.

The models purpose is to capture range expansion by confirming a bullish or bearish cycle with specific areas for defining risk and targets for scaling while also reducing market exposure.

**Insight CSSM** All of the models have fixed settings that do not need to be optimized or updated, each model has five un-correlated indicators that are used for confirming bullish and bearish cycles. The data alignment allows you to clearly see how the process of a confirmed cycle can produce confidence, help you avoid over-trading, late entry, and good timing for high odd trade setups. This process enables you to benefit for the duration of the trend by allowing you to manage your position by trailing it and enabling you to book profits as the cycle concludes, this reduces market risk as prices move on to its next phase.

### **Purchase of *Insight CSSM* includes the following:**

***Insight CSSM*** Chart codes: Cycle Swing System Model built using charting software (TD Ameritrade).

- **One-on-One *Insight CSM* Training:** During our first meeting we will review *Insight CSSM* in full detail and how the process works. I spend time throughout the month teaching the model. We will schedule dates and times that are reasonable for your schedule. We commence with a specific period of choice: shorter duration or longer duration, whichever fits your objective style. We go over how *Insight CSSM* reveals and confirms bullish and bearish cycles. During these sessions we will discuss what is expected from price on the different models, we will also talk about statistical trading research. By learning the *Insight CSSM* model in this fashion you begin to clearly see the simplicity of this model and how the models confirm a **“CYCLE”**. Within a short time, you will learn how to trade the *Insight CSSM* and risk manage your positions. Training Duration: One Month.
- **Optional Add-on Feature: *Insight CSM (INSIGHT Cycle System Model)*** for an additional fee clients may add-on this product: ***Insight CSM (Cycle System Model)***. Why is this add-on feature so important? It has an automated built-in cycle confirmation system for the 15 minute, 30 minute, 60 Minute and daily time frame. The short-Term model structure and the long-term model structure provides key tradable structural levels that further confirm areas of structural support and resistance. As the short-term and longer-term price structure develops, these structural levels are reinforced and price will confirm bullish and bearish cycles between these levels or when a bigger trend is emerging. As you see the natural framework of price your trading success will grow because you can see the structural synchronicity over multiple time-frames and have confidence that the structure is reliable and tradable. This process brings out confidence in your decision making and makes it clear. Add energy info.

### **Market Coverage & Trading Style:**

***Insight CSSM*** is meant to be used with any market. The beauty of our system is that we can use our *Insight CSSM* research on most instruments, so you can trade stocks, futures (Bitcoin, Ether), or Forex with *Insight CSSM* and have confidence that the model will reveal confirmed cycles and targets. Time is a commodity and schedules are often fluid... fortunately the *Insight CSSM* adjusts around you. As your daily, weekly, or monthly schedule shifts, you may shift your trading style to favor longer term high probability swing trades vs. day trades with defined levels of risk.

### **Software Requirements:**

**[TD Ameritrade](#)** charting platform has no cost and they provide a live data feed. Once you have signed up with them I will send you the master chart codes. I will also assist you with setup and provide you with a tour of this very user friendly package using Team-Viewer.

**Program Costs: *Insight FM* - \$4,995.00**

## **“NO REFUNDS” POLICY**

Since Global Insight Consulting is offering largely knowledge-based, non-tangible, irrevocable goods and training, we do not issue refunds once the order is accomplished, training has commenced, and trading chart codes, instructions, or other related materials or products have been delivered. As a customer you are responsible for understanding this upon purchasing any item from Global Insight Consulting.

Please note that we do not bear any responsibility and therefore we do not satisfy any refund requests based on incompatibility of our products with some third-party software (trading platforms, plug-ins, add-ons, modules, search engines, scripts, extensions, etc.) other than those which are specified as compatible in the introductory letter sent prior to your purchase of this product. We do not guarantee that our products are fully compatible with any third-party programs and we do not provide support for third-party applications.

Global Insight Consulting is always eager to assist you and deliver highly professional support in a timely manner. Thank you for purchasing our products and by doing so you acknowledge that **ALL SALES ARE FINAL AND THERE ARE NO REFUNDS.**
